

The **K Pro** Difference:

Most companies perform the crystallization procedure which results in Vein Erosion (Physical Damage to your stone... i.e. pits, holes)

Ceramic Tile:

Unlike our competitors, we DO NOT simple coat floors to provide a polished look. Our cleaning procedure keeps tile floors looking new and bright, while preventing future build-up. Our impregnating process prevents grout lines from urine stain, odor, and soil build-up.

YOU HAVE TO SEE IT / FEEL IT TO BELIEVE IT.

K Pro Stone Care
Stone Care Technology for Natural Beauty.
